Let’s talk: our communities, our health
Unconference summary

**Topic:** Patient experience survey: how to improve results of the medication question in the survey

**Our one big idea:**
Patient-centred integrated MEDICINES RECONCILIATION.

**Main points of the conversation/emerging themes:**
- Complex and challenging PROCESSES cause risk during transfer of care.
- The patient is the single source of truth.
- Clarity needed about roles/skills for medicines information/management.
- Share data with influencers, eg, funders.

**Ideas/questions/issues for further discussion:**
- Whose responsibility is it to UPDATE/CORRECT medication lists.
- IT solutions to patient carrying medication list, and non-IT alternatives.
- Does the yellow card work? If not, why not?
