

Being smart with data: Will it increase our capability?

S Connor

CDHB

E-clinical health lead

HPB Surgeon

Only if....

- Collect accurate data

 - need to go to the source most likely to give the correct answer

 - Optimise ability to collect the data

 - Remove the redundancy and rework

- Know what we want to measure

 - Potential amount of data will be overwhelming

 - Strict definitions so apples coded as apples

 - Will need clinical engagement to ensure clinical useful outputs

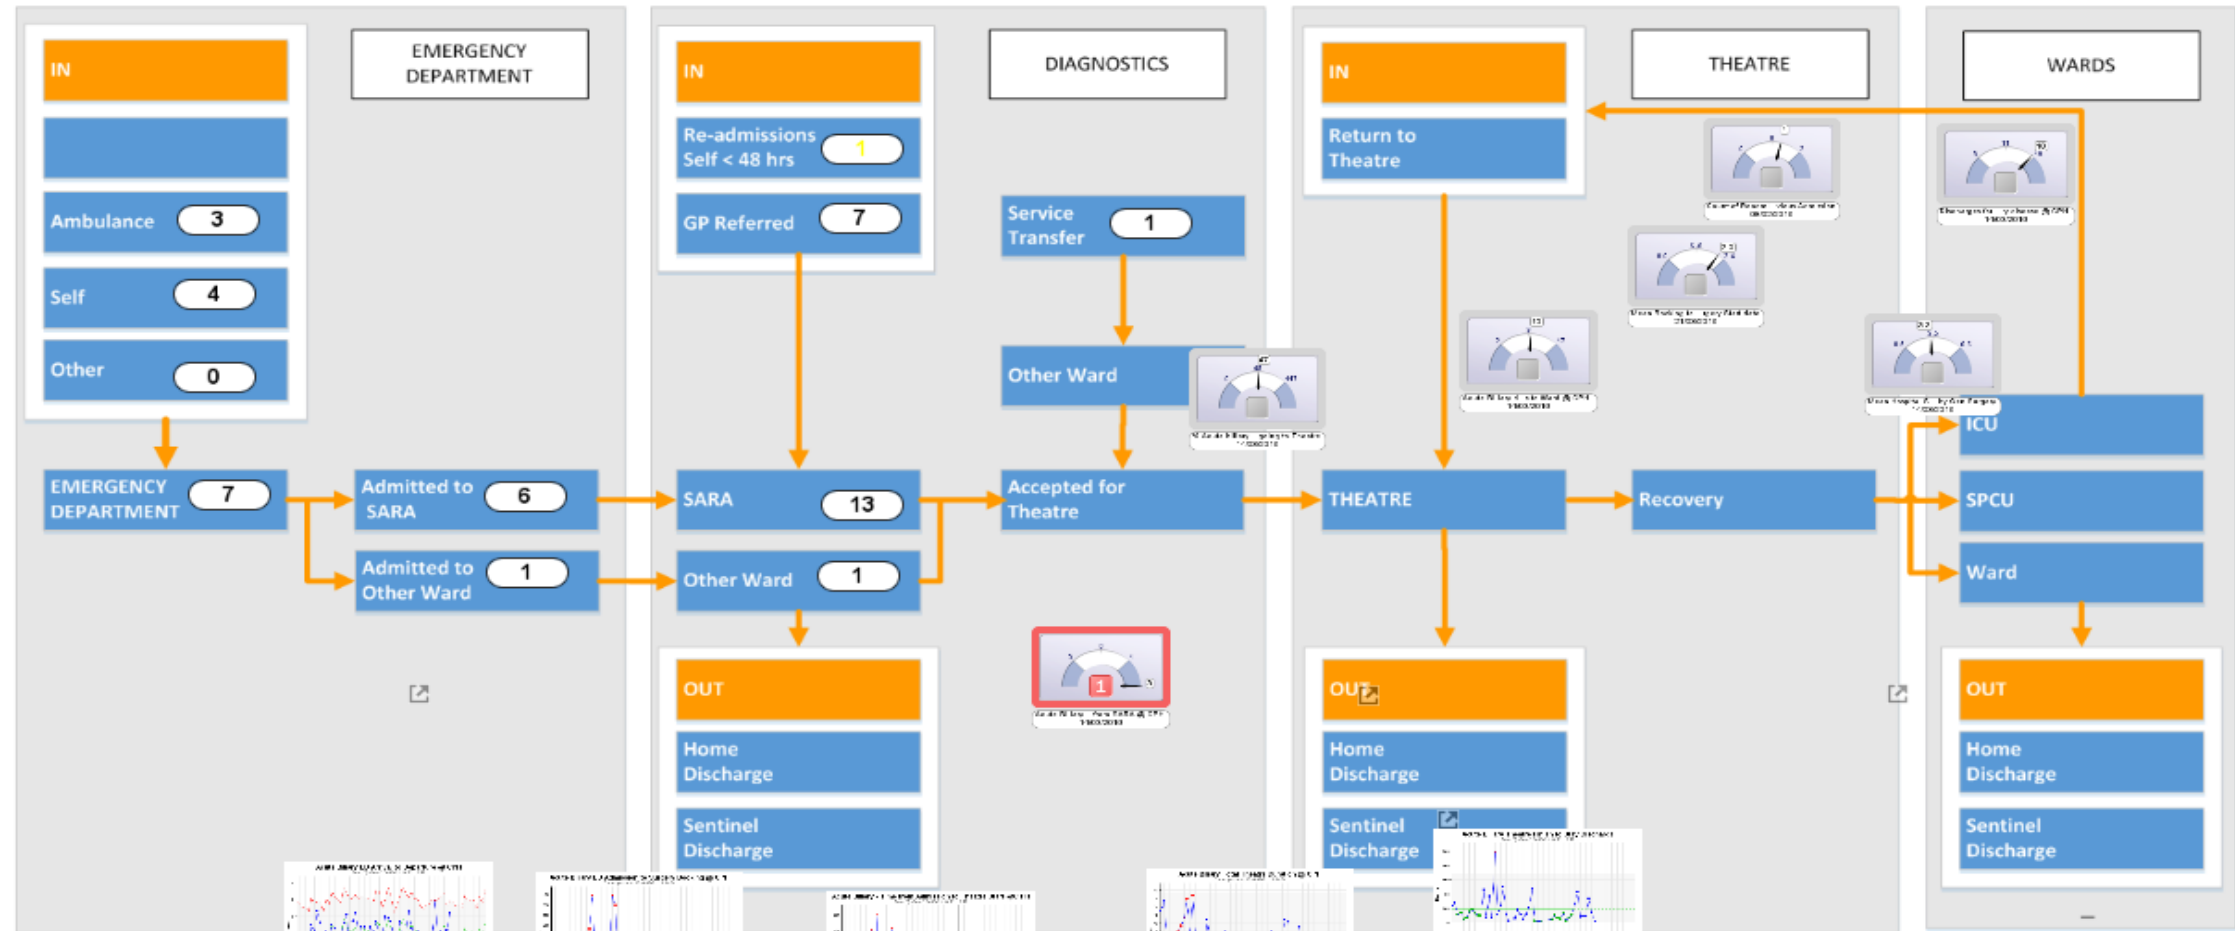

- To drive change need to

 - Create visibility

 - Format so that the end user understands and relates to it

 - End user feels empowered to influence the measurement

Total Length of Stay
 Occupied Bed Days
 Total Ward Moves
 Overflows

SYSTEM OUTCOMES MEASURES:
 Mortality rates In hospital and 28days
 Readmissions in 28 Days
