

Patient experience survey

Please tell us what
you think of our
health care service

We want to hear from you!

This week is survey week.

We want to know how you found your experiences with doctors, nurses and staff in the health care system.

The survey is voluntary, and anonymous. You can complete it at home, on a computer, tablet or smart phone. It takes about 15 minutes.

What do I have to do?

You may get an email or text inviting you to take part. Please help us improve the quality of health and disability services in New Zealand by doing the survey.

Ngā mihi nui, thank you!
