## Patient Preferences

Module ► Patient Register

The Patient Preferences section opens up in a separate web-based window and is accessed from the Patient Register (F3) screen. For this icon to be available, you must ensure the patient's NHI has been validated. For more information on how to validate an NHI see the **Validating** *NHIs in Medtech32* user guide.

### medtech®

Patient preferences can be collected from the patient during a consultation or initial enrolment.

The checkbox is unticked by default, indicating that the patient would like to participate in the Patient Experience Survey. The Email ID and Mobile Number if available in the Patient Register will be populated in the respective fields automatically.

If you tick the checkbox for Question One (i.e. you would NOT like to complete the survey) the following two questions for Email ID and Mobile Number are greyed out.

Once you click the 'Save' button, the following message will appear:

Figure 3 – The Patient Preferences Saved Message screen

If the patient already has their preferences recorded, you will have the option to update those preferences and save them accordingly.
