

Adult primary care experience survey

SURVEY OVERVIEW

This survey covers different aspects of primary care patient experience, including communication, partnership, physical and emotional needs, cultural safety and access to care. Demographics are collected to understand how experiences vary between different population groups.

The survey uses a modular approach, where patients only answer questions relevant to their experiences. This is represented by the image below, whereby all patients are asked about their recent experience at their enrolled place of care but only see the other modules if relevant. Some questions and modules are on rotation and only asked annually (shown in green boxes).

PROGRAMMING INSTRUCTIONS

This version of the survey shows the logic that 'skips' people to appropriate questions based on their answers. Not all people see all the questions.

Programming instructions are noted **[LIKE THIS]**. They show question type and any routing or visual reference information as well as indicators for piping in responses. They are not visible in the online questionnaire itself. If nothing is shown for filter the default base is all respondents and default question type is single choice.

Items which are derived from question responses and used for subsequent routing or piping within the questionnaire are shown in grey boxes.

No questions are compulsory.

[SHOW HEADING]

Thank you for taking part in this important survey about your recent experience with **[PRACTICE NAME]**.

Your feedback will help us understand what went well and if there is anything that we could have done better.

It will take around 10 to 15 minutes to complete this survey depending on your answers.

Unless you would like us to contact you, your responses are anonymous and will not be connected to you in any way. Please be open and honest in your feedback.

How to complete this survey:

[SHOW HEADING]

Going back to change an answer

Your responses are submitted as you go through the survey. You can move backwards to change your answers by clicking the “Previous” button at the bottom of the page. If you use the “Back” button on your internet browser or mobile phone and get taken out of the survey, you can return to where you were using your login code. Your earlier responses will have been saved.

Complete later

If you would like to return to your survey to complete it later, close the window and then return to the link provided in the email or text message and re-enter your login code. Your earlier responses will have been saved.

Skipping questions

You can skip any question you do not want to answer, cannot remember or that is not applicable to you. Just leave it blank and click “Next” to move to the next question.

Ready to begin?
