Perioperative Mortality
Review Committee

Prior to the surgery

- Information
- Connection and Engagement (family too)
- Honesty
- Think about how you leave someone feeling

During surgery

- Competence
- Focus
- Minimal fatigue/stress

After the surgery

- Contact
- Honesty
- Information
- Follow-up

“Weekend effect”

“Weekend effect reduces chances of surviving surgery”

surgical death rate on weekend more than triples...

- Get the Patients point of view on 24/7 care versus 24/5 care
- Partnership to co design responses to these recommendations

Consumer's Voice

New Zealand Choosing Wisely

“Perhaps the greatest potential is genuinely bringing about culture change among health professionals and patients, in increased understanding and discussion of the downsides of treatments or investigations.”

“Same graph as last year,
but now I have an additional dot.”
